

Madrona

M1

Introducing the Madrona M1 Gas Stove.

The Madrona M1 combines the look and feel of a wood-burning stove with the latest in gas burning technology.

A large arched viewing area gracefully frames a natural-looking, captivating fire that evokes an open fireplace feel. You are sure to forget that the Madrona M1 is using sealed combustion, direct vent technology for the best in efficiency and safety.

In addition to the clean lines and cast iron craftsmanship you will appreciate the convenience, energy savings and impressive radiant heating power of this freestanding stove.

Timeless, durable, and efficient the Madrona M1 is sure to enhance and warm your living space.

Our new *E-Pilot* ignition system and fully automatic control make the Madrona the most advanced freestanding gas stove on the market today.

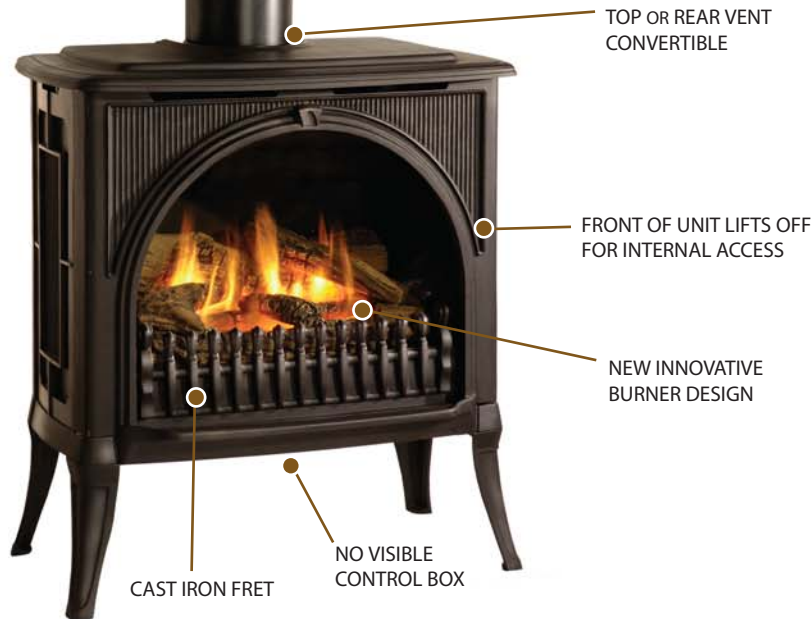

MILES
FIREPLACES

Madrona^{M1}

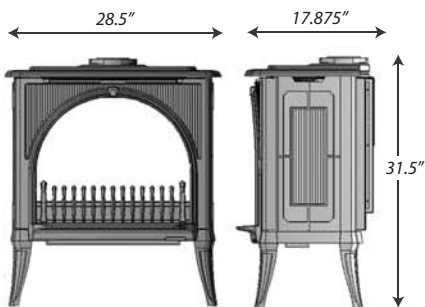

As dramatic and rugged as the North American Pacific coastal tree that it is named after, the Madrona M1 gas fireplace stove is a magnificent sight.

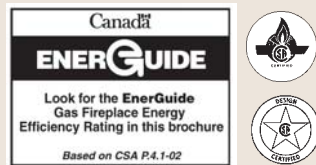

FEATURES

- **No standing pilot is necessary!** With our new *E-Pilot* ignition system you can light, and turn off the pilot from your couch! In these days of heightened energy awareness, the ability to easily turn the pilot on and off is an energy-saving feature that will also *save you money*.
- **Fantastic fire view: a big stove with a big, clear window!** The Madrona M1 definitely has a presence of its own. With its large arched opening, and its clean cast front, the Madrona M1 is a freestanding fireplace like no other. Viewing the realistic fire is what this stove was designed for. High flames and an ember bed glow add up to create the realistic look of a real wood-burning fire!
- **Heater Rated:** The large secondary heat exchanger runs all the way across the top of the Madrona fire box, and creates a steady flow of hot air with no need for a fan. The radiant heat - which Miles Industries is known for - makes the Madrona M1 feel much larger than it is.
- **No electricity required!** No Power? No Problem! Your Madrona M1 stove will keep you warm even in the event of a power failure.
- **Raise and lower the flames from your couch!** Not only can the remote control light the pilot and function as a thermostat, but it can also adjust the flames up and down, giving you complete fire and heat control at your finger tips.
- **Fuel Friendly:** Your stove is factory prepared and safety-tested for the fuel you choose. Stoves can be ordered natural gas or propane ready—no field conversions are required!

SPECIFICATIONS

COLOURS

Clearances:
12" from top, 5" from the back & 6" from each side.

MODEL/FUEL

Model	Fuel	Co-axial Direct Vent	Max. Input BTU/hr	Min. Input BTU/hr	EnerGuide Rating	High Fire Output BTU/hr**	Out Fire Output BTU/hr**	A.F.U.E.++
MF28EN	NG	4" x 6 5/8"	28 000	12 000	68.5%	20 620	7 990	71.3%

ACCESSORIES

MFDKSG	Clip-on safety screen.
555CFK	Circulation fan kit - variable speed - thermally activated.
556CLA	Co-linear adapter kit, converts co-axial flue to flex pipes for venting.

For a complete list of venting options, please see your Valor dealer or visit our website at www.milesfireplaces.com

The New *E-Pilot* ignition system offers you complete control of your fireplace.

- Turn your pilot light on and off.
- Manually set your heat setting and adjust the flame height up and down.
- Program your fireplace to turn on and off at 2 pre-set times - day or night.
- Use the automatic mode to adjust your fire up or down to maintain the room temperature that you pre-set.
